U.S. Permanent Resident — AI Engineer with end-to-end experience designing and deploying intelligent systems across ML, NLP, and agentic AI. Deep hands-on background in RAG pipelines, vector databases, MCP integrations, agentic architectures, and AI skill/tool orchestration—combining strong modeling and engineering skills with product and business judgment to deliver measurable outcomes.

Education

Miami Dade College **2023 – 2027 — A.S. 2026**
B.S. Applied Artificial Intelligence (AI Engineering) — A.S. Computer Programming & Analysis *GPA: 3.9*

Technical Skills

AI / ML: Machine Learning, NLP, Computer Vision, Predictive Modeling, Classification, Ranking & Search, RAG, Agentic AI, MCP, Vector Databases, Model Evaluation, Fine-Tuning, AI Ethics

Languages: Python, Swift, Java, C++, SQL

Frameworks & Tools: TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers, LangChain, LlamaIndex, Qdrant, Pinecone, Pandas, NumPy, FastAPI, Docker, AWS, Redis, PostgreSQL, Git, Azure DevOps

Experience

Encountr **Sept 2025 – Present**

AI Engineer / AI Product Lead

- Designed and deployed end-to-end ML pipelines transforming raw speech into structured behavioral signals (EQ/RQ scores), enabling longitudinal predictive insights across the user base.
- Designed multi-turn conversational agent flows with dynamic memory, context window management, and safety constraints—ensuring consistent tone, persona, and reliability at scale.
- **Generated the company’s first revenue** by deploying an AI agent used internationally to qualify and gather intelligence on prospective attendees for a global conference, directly unlocking a new business line.
- **Tech:** Python, FastAPI, AWS, Docker, Redis, Hugging Face, LangChain, Qdrant, ElevenLabs

U.S. Chamber of Commerce — Spark Founders **Jul 2025 – Aug 2025**

AI Developer (Program Participant)

- Performed algorithm analysis and feature engineering across 14 domain-specific parameters (cosine similarity, token overlap, sentiment, keyword importance); benchmarked Hugging Face encoders to improve matching accuracy.
- **Tech:** Python, Pandas, Hugging Face, NLP, ML

BusyBee **May 2025 – Aug 2025**

AI / Data Engineer Intern

- **Delivered a commercially licensed data pipeline** later adopted and sold as a data processing solution to enterprise clients, generating direct business value beyond the internship scope.
- **Tech:** Python, Pandas, Kafka, RabbitMQ, SQLAlchemy

Globant (Carnival Cruise Lines) **May 2024 – Aug 2024**

iOS Software Engineer Intern

- Developed and maintained iOS UI components for Carnival’s flagship mobile app serving millions of customers; contributed to sprint planning and code reviews within a large Agile team.
- **Improved crew operational efficiency** by engineering a hidden offline-accessible environment data page for ship crew, enabling fast emergency responses without internet connectivity at sea.
- **Tech:** SwiftUI, Objective-C, CoreData, Xcode, Azure DevOps

Mobile Applications Developer **Jan 2022 – Jan 2024**

Independent Contractor

- Designed and shipped iOS and Android applications independently, managing the full product lifecycle from requirements gathering and stakeholder feedback to deployment and iteration.
- Prioritized user experience at every stage, conducting informal usability reviews and incorporating feedback loops that measurably improved app retention and satisfaction across client projects.
- **Tech:** Swift, Kotlin, Xcode, Android Studio

Certifications, Activities & Languages

- Apple Swift Associate & Swift Certified User — Google Crash Course on Python — CodePath: Data Structures & Algorithms
- PlutoHacks Miami 2024 — SOS Map App — World-Ranked Brazilian Jiu-Jitsu Black Belt
- Portuguese (Native), English (Fluent), Spanish (Fluent)
