U.S. Permanent Resident — Software Engineer & AI Developer with full-stack experience designing, building, and deploying production-grade applications across web, mobile, data, and intelligent systems. Proven ability to work across the entire development lifecycle — from architecture and backend engineering to AI integration, data pipelines, and cloud deployment — with a strong focus on delivering solutions that create real business value.

Education

Miami Dade College **2023 – 2027 — A.S. 2026**
B.S. Applied Artificial Intelligence (AI Engineering) — A.S. Computer Programming & Analysis *GPA: 3.9*

Technical Skills

AI / ML: Machine Learning, NLP, RAG, Agentic AI, Vector Databases, MCP, Model Evaluation, Fine-Tuning, Predictive Modeling, Classification

Languages: Python, Swift, Kotlin, Java, C++, SQL, JavaScript

Frameworks & Tools: FastAPI, React, Node.js, TensorFlow, PyTorch, Scikit-learn, Hugging Face, LangChain, Qdrant, Pandas, NumPy, Docker, AWS, PostgreSQL, Redis, Git, Azure DevOps, Xcode, Android Studio

Experience

Encounter **Sept 2025 – Present**
Software Engineer / AI Developer

- Designed and built production AI systems end-to-end, including data ingestion pipelines, NLP classification models, agentic workflows, and cloud-deployed APIs serving real users.
- Developed multi-turn conversational flows with dynamic memory management, context handling, and safety constraints across a voice-first platform.
- **Generated the company's first revenue** by engineering and deploying an AI agent used internationally to qualify prospective attendees for a global conference, directly unlocking a new business line.
- **Tech:** Python, FastAPI, AWS, Docker, Redis, Hugging Face, LangChain, Qdrant, ElevenLabs

BusyBee **May 2025 – Aug 2025**
Software Engineer Intern

- Architected a configurable Python-based data processing pipeline handling ingestion, schema validation, transformation, and scoring across multiple heterogeneous data sources.
- **Delivered a commercially licensed data pipeline** later adopted and sold as a data processing solution to enterprise clients, generating direct business value beyond the internship scope.
- **Tech:** Python, Pandas, Kafka, RabbitMQ, SQLAlchemy

Globant (Carnival Cruise Lines) **May 2024 – Aug 2024**
Software Engineer Intern

- Built and maintained iOS UI components for Carnival's flagship mobile app serving millions of customers; contributed to sprint planning and code reviews within a large Agile engineering team.
- **Improved crew operational efficiency** by engineering a hidden offline-accessible environment data page for ship crew, enabling fast emergency responses without internet connectivity at sea.
- **Tech:** SwiftUI, Objective-C, CoreData, Xcode, Azure DevOps

Mobile Applications Developer **Jan 2022 – Jan 2024**
Independent Contractor

- Designed and shipped iOS and Android applications independently, managing the full product lifecycle from requirements gathering and stakeholder feedback to App Store deployment and iteration.
- Delivered solutions across multiple client projects, translating non-technical business requirements into polished, functional mobile products with strong user experience and retention outcomes.
- **Tech:** Swift, Kotlin, Xcode, Android Studio

Certifications, Activities & Languages

- Apple Swift Associate & Swift Certified User — Google Crash Course on Python — CodePath: Data Structures & Algorithms
- PlutoHacks Miami 2024 — SOS Map App — World-Ranked Brazilian Jiu-Jitsu Black Belt
- Portuguese (Native), English (Fluent), Spanish (Fluent)
